

JakMatDairy

THE SOLUTION TO RACE PROBLEM AREAS CAUSED BY HIGH STOCK TRAFFIC

Stabilise race pressure points and create a smooth transition zone from race to concrete with the *JakMatDairy* system.

Enjoy the long term benefits:

- Enhanced drainage - no potholes & less carry-over to shed
- Reduced risk of lameness
- Improved cow flow
- Lower maintenance cost & effort
- Ultimate strength & material retention due to the unique honeycomb structure

The ground stabilisation mat for high pressure animal traffic areas

JakMat Dairy

The race stabilisation mat for high pressure animal traffic areas

Easy installation & maintenance with the JakMat Dairy system:

- Easy to handle, lay & cut to size if needed.
- Lay between milking with few disruptions.
- Lower on-going maintenance costs due to a long lasting and stable race surface being created.
- Reduce mud and excrement 'carry over' into the milking shed with reduced clean down
- Holds soft aggregates, sympathetic to animals hooves, on race surface thereby reducing material refill cost.

Product Features:

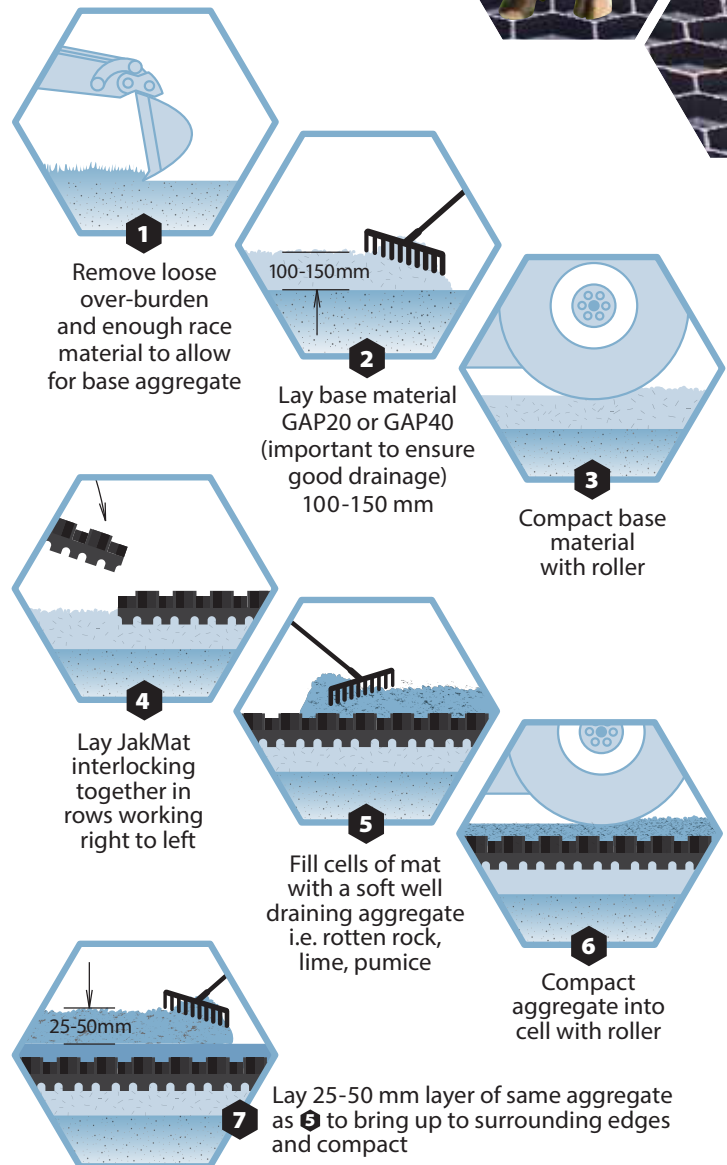

- Unique interlocking system between mats giving even weight distribution over cells.
- Designed with a honeycomb structure which, as in nature, is inherently strong.
- NZ designed and manufactured for local conditions especially high rainfall.
- Produced from 100% recycled plastic with UV stabilisation for long life.
- Stackable and light weight for lower transportation and storage costs.

TECHNICAL DATA	
Mat Size	Mat 585 x 400 x 43
Weight Bearing (Compression Testing)	Test: JakMat packed with GAP 7 aggregate and compacted by hand. A 200mm x 9mm carbons steel plate disc was loaded as follows: 1. Loaded to 3500kg/34.4KN - No Visual Change Observed 2. Loaded to 12910kg/126.6KN - 0.7 mm deflection Observed
Material	Polyolefin (Recycled) UV stabilised
Colour	Black
Coverage	4.27 mats / sq metres
No. Mats/Pallet	192 units (45 sq metres coverage)
Pallet Dimensions	1.2 x 1.2 x 0.92 metres
Pallet Weight	243kg*
Pallet & Strapping Material	Wood pallet PP plastic strapping
* Pallet weight can be changed to suit transportation particularly where helicopter transportation will be used.
