 140 Manuroa Rd Takanini, Auckland
 Car Park Application
 May/June 2014

JakMatGeocell The sustainable driveway and paving alternative

JakMat Preparation for Driveway Application Contractor: Paul Hood Landscapes

1 Ground preparation entailed:
 a) removal of previous concrete paver surface;
 b) putting down of small layer of base course aggregate (GAP20) over an existing base and
 c) levelling compacting

2 The **JakMat Geocell** was laid with cutting done where necessary, with power and hand tools, for a snug fit against concrete haunching.

3 A decorative river pebble 5 - 10mm (discrete) was used for the filling and capping the **JakMat Geocell**.

4 Utilities were easily worked around with cutting of mats.
