

Driveway Application - Life Style Block
Silverdale, Auckland
Laid in September 2011

JakMatGeocell

The sustainable driveway and paving alternative

JakMat Preparation for Driveway Application

Andrew and Donna laid down JakMats for a driveway application covering 215m², previously covered by lime rocks.

The surface area was levelled to allow for a base aggregate then decorative shells were filled for a pleasant aesthetic.

JakMatGeocell contains the materials in place, for heavy duty vehicles such as water trucks.

Decorative river stones used along the sides of the driveway to show contrast.
